

# SAVE THE VIEW NOW

design by luca labanica azcilo.eu

We need your help to save the iconic American view of the Brooklyn Bridge as seen from the Promenade. The size of the Pierhouse is well beyond the original plans and is stealing this historic view from the public and millions who visit every year. The Pierhouse obstructs the view of the skyline and bridge in direct contradiction to the strict height limits and other parameters agreed to by the community after extensive negotiations.

Working together is the only way to restore the views. Help Save The View Now, sign the online petition, spread the word, and get involved. Visit [Savetheviewnow.org](http://Savetheviewnow.org) to learn more.
